

Who

Malia is a student at Scales Elementary School, she is one of the winners of a scholarship provided by Discovery Center. She looks up to Prentice (a member of Discovery Center's youth council), and wants to join the Center's youth council once she's old enough. Like kids of her generation she is present online and makes small video clips of the wildlife she finds around Murfreesboro specially on the wetlands.

Thinks

It's nice to learn about science, I think it gives a voice to us, children and because the world is changing, specially with climate change, it's good to be prepared to solve that type of problem.

Says

"It would be fun to win a scholarship to learn more about ecology"
"The model of the water cycle was cool"
"I like Prentice"

Feels

I love TikTok, it's really fun, but there is no content related to learning and science, I would like to have fun while learning and interesting experiences as well.

Does

She loves spending time with her mom, because she really listens to her. Malia is an avid reader but also loves communicating. Her mom helps her make some of the videos for her channel, they have a very special bond.

Pains

I sometimes struggle explaining my mom that she should take care of the planet, I try to make her be more aware, but it is difficult.

Gains

Having the Discovery Center nearby, and support from their staff has helped me learn so much this year.

Malia Tyson

Who

Being the mother of two is not easy. She gets a lot of help from her husband, but like many women from her community she handles most tasks. Her husband works in a part-time job on weekends, so she needs to find recreational spaces for her two children.

Thinks

My kids spend a lot of time playing with their smartphones at home, but if I take them to the discovery center, they become detached from their gadgets and start exploring nature, it's really magical.

**Angela Tyson****Says**

"The discovery center is a very inclusive space, you get to work with other members of our community"
"It's lovely to see kids from different backgrounds get together, solve trivia challenges and learn something new"

Feels

The center does a lot of work in keeping the community involved, and overall it's a nice place. I would visit more often but paying every time is really expensive.

Does

Angela drops her husband at work, and then takes her kids to the Discovery museum to spend the evening.

Pains

My kids seem to get sick after the visits, maybe they should clean up some areas, kids touch everything and it's impossible to keep an eye on them 100% of the time.

Gains

My kids love the experience, it involves playing, exploring and time with me.

Who

Prentice is a young African American influencer. She began making videos about makeup techniques and reach a considerable following. She now helps her family by promoting products of local beauty shops. Despite all this, she is also acutely aware of the raising environmental issues, she knows she has a voice and thus tries to make her audience have a more active stance against pollution.

Thinks

"I think the discovery center raised my awareness about environmental issues, I remember reading articles about how the ocean levels are raising and it just blew my mind"

"I think girls my age such as Greta are leading us in the right direction, we have a voice and a responsibility"

Says

"I try to help out doing my videos, I actually really love fashion and makeup"

"Some people see a bit of a dissonance between how I make money and my ideals, but it's something I'm still figuring out"

Prentice Penny

Feels

For most of us in Murfreesboro, we grew up going to the discovery center, it used to be fun. Sadly places like the Science Center in Nashville are more interesting for kids my age, I'm not sure why they haven't tried to update the exhibits to fit older kids.

Pains

Being a YouTube star is awesome, but filming every day and keeping up with school is tough. Thankfully I have my older sister to help me do all the editing.

Gains

It's nice to walk around town and have people greet you, I remember when I was just another girl, now I get a lot of attention and it rocks.

Does

Prentice is like any other teenager, except she has a clear understanding of where she wants to go to. She began making fashion and beauty videos with the help of her elder sister and became an instant success in TN. Other than her life as a local celebrity she is actively engaged in environmental issues.

Who

Soran is a smart kid, before the war his family owned several shops and were well off. He was forced to seek work in Egypt, but eventually the economic crisis there forced him to seek other options. With the help of a global student organization he found the mentorship and aid to start his education in Murfreesboro's university.

Thinks

Its hard sometimes to enjoy myself, knowing the hardships my family goes through back home. But I'm also young and I try to make use of my time here as much as I can.

Says

"War takes a toll on you, people you love are forced to live in terrible conditions, sometimes your closest relatives also get taken away from you"

"Despite all the bad things, god has given me the opportunity to keep my head high and help my family"

Soran Ghazi

Feels

For some people the center is not 100% up to standards, of course such institutions don't even exist where I come from, so for me it's always a treat to pay the center a visit and learn about the wildlife of the county.

Pains

I struggle a lot of fitting in with this culture. Most of the people here are devoted Christians and feel threatened when I stop to pray.

Gains

Moving to America has been some sort of dream, I lost so much when I was younger, but hopefully this is a step in rebuilding my life.

Does

Soran is a very spiritual person, he keeps his faith close at heart and it helps him stay focused in tough situations. He enjoys studying and playing sports, it keeps his mind distracted from some things he's been dealt with.

Empathy Mapping

The Discovery Center

June 12 - 2020

Who

She comes from a wealthy family, and is very attached to the city. Like many members of her class, they own a lot of land, but can't actually make use of it in today's economy. She has a lot of connections and sees the continuous decay of the museum. She sees herself as a very influential person in society but wants to have a reachable goal, like getting the museum restored.

Thinks

"I think the museum doesn't reflect the people of Murfreesboro, we are one of the richest cities in TN, and we deserve something better for our children"

Katy Clancy

Says

"The museum has always been a nice place to meet friends, specially those who also have kids"
"It's big enough to take a long walk and talk, and have the kids use all their energy"

Feels

The exhibitions are focusing on the right subjects, but they lack quality, they look as if they got stuck in the 80's.
I love the museum experiments with events, such as India day, it helps communities have a taste of other cultures.

Does

Katy spends most of her days helping her husband get ready for work in the morning and then organizing evenings with friends. She enjoys discovering new places in Murfreesboro.

Pains

"I would like this institution to make us stand out, it has a lot of support from all the community, but it needs a face lift"

Gains

I like to hear my friends thank me when I take them to educational activities such as this.

Who

Nathaniel comes from a family of workers, they didn't aspire too much, but saw great potential and help him go to college. He believes in hard work and education as a way to get ahead in life. Nathaniel sometimes feels a bit out place with the wealthier members of Murfreesboro, but his skills and talents are valued by everyone.

Thinks

"With the museum running different STEM temporary exhibits, I think our programming workshop would become a great hit"
"The museum's area probably has some room for adding a programming complex, to invite parents and their kids alike and help them get in tune with technology"

Says

"I'm really lucky to come from a working class family that had the imagination to help me pursue a career in software engineering"
"My parents never understood what a computer was for way back when, but they went to great lengths to encourage my love for these machines"

Nathaniel Matthews

Feels

The discovery center has done a great job at partnering with local education institutions and expanding their reach by working inside a network.
In terms of projection, they have partnered as well with leading companies, they fully understand their impact in helping kids get the right skills for the future.

Does

Nathaniel likes to tinker and build things, it's what he loves doing in his free time. Aside from that he spends time with his wife running programming workshops over the weekends for kids and adults.

Pains

He has worked for a long time in different parts of the US and sees how his city is lagging in many areas, he is specially concerned with the lack of information technology.

Gains

He would like to be seen by other working class citizens as a role model, a way of reaching the American dream in a new era.

Who

Dominic is one of the wealthiest members of Murfreesboro. He is a person with the desire to make a big impact in society. As such, he understands that having top institutions and educational centers is key to establishing his legacy. He is aware of the many areas in which the Discovery Center is ailing, and wants to take part in its restoration.

Thinks

"The discovery center is a place where young minds are inspired to dive into science and exploration, it's mission must be in tune with today's technological demands."

Says

Growing up I saw many of my friends lack the opportunities that I had, I always wanted everyone to have a fair chance of making it, and that for me started with equal education.

"I remember when the first plans of the museums were being laid out and fundraisers came to me for donations, it was one of the first big projects I contributed to"

Feels

Pains

They museum shows signs of moderate growth but pales in comparison with other institutions, if we want to stand out as a city we need to start being more competitive.

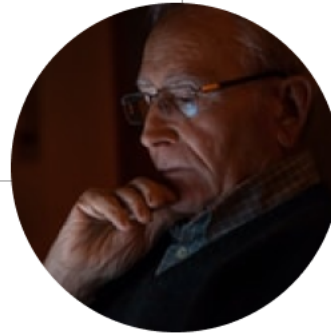

Gains

Life is about struggle, I see the museum's woes as a way for the city to regain some of its former shine.

I have read some positive and negative reviews on the Discovery Center, some things they are doing right have to do with including all the members of Murfreesboro.

Does

Like most people his age he dedicates part of his spare time playing golf. Every morning before going to his office, he stops at Wendy's for breakfast. He likes to binge watch serial killer series on Netflix with his wife.

About Malia

"Used to love the Discovery Museum, it's still a nice area to shoot some videos."

Name

Malia Tyson

Age

8-10

Status

Single

Location

Murfreesboro, TN

Role

School Student

Goals

Malia is really attracted by science and loves animals, she wants to work one day in a museum such as the discovery center or in a lab. Her mother encourages this traits and wants her to have a change at reaching this goal.

Behavioral Considerations

She is tech savvy, helps her mother with basic tasks like ordering and organizing activities with the iPad. She also helps her grandmother when she is stuck using her phone. Malia is the center of attention in her family, she also has caught the attention of some of the staff at the Discovery Center because she is always curious and asking amazing questions about the exhibits.

Tasks

Malia sees the museum as a place where she can fully express herself, learn about things she can't find online and feels more in tune with the guides and experts from the Discovery Center.

Frustrations

She is part of a generation that sees interacting with technology akin to breathing, she sees a lack in up to date channels in the Discovery Center that allow her get a fully interactive experience.

About Angela

"I feel the Discovery Center has opened up to people from our Community, but for the most part I still only see white folk"

Name

Angela Tyson

Age

34

Status

Married

Location

Murfreesboro, TN

Role

Administrative support at local manufacturing Co.

Goals

The Discovery center is both a place for here to enroll with the kids in learning events and take long strolls, she finds it has the right balance.

Behavioral Considerations

As a woman of African American descent she knows hard work is key to ensuring a good future for her kids. Unemployment figures are an issue and with looming economic recessions she tries to balance tough working hours and raising her kids (this needs review). She is aware of some recent spikes in hate crimes and this burdens her.

Tasks

She takes her kids on a regular basis to the Discovery center because she acknowledges that it's a place that harnesses societal values such as tolerance, peace and respect. These are the foundations she sees her kids inheriting and will probably give them a better future.

Frustrations

Hate crimes, social disparity, income and wages are tough to change for the bottom 20%.

About Soran

"I'm one of the few lucky students to get a scholarship and come to American to finish my higher education"

Name

Soran Ghazi

Age

17

Status

Single

Location

Murfreesboro, TN

Role

International refugee student at Central Magnet School.

Goals

Coming from a war torn area, Soran's goal is to graduate from medicine school and wants to seek asylum for his family, his parents died but his younger sister still lives in Damascus, and he wants her to have the same opportunity he got.

Behavioral Considerations

Soran attended a private school and his top grades put him in the radar of a student association that helps talent in war torn countries. They got in touch with him and invited him to finish his education in Murfreesboro and then continue his College education in the US.

Tasks

He is inclined to the sciences, so normally he feels great relief walking in the museum's spaces and learning as much as he can from his new home. He is part of Discovery Center's Youth council. He likes to help others learn and he sees that council as a way to build new lasting friendships.

Frustrations

Unlike most kids his age, he carries a great burden. He struggles to adapt to a new culture but is aware it's way worse for most of the kids his age back home.

About Emily

"I really enjoyed being a real estate agent, but being a full time mom is the most rewarding job, and the greatest responsibility."

Name

Katy Clancy

Age

35

Status

Married

Location

Murfreesboro, TN

Role

Stay at home wife

Goals

She knows every off the beaten path destinations in Murfreesboro. She has a close group of housewives that plan regular visits to the many events and venues in the city.

Behavioral Considerations

She used to work as a teacher, but after having her firstborn she decided to let go of her profession and become a full time mother. Even though she takes her role very seriously and feels humbled about it, she is also a sybarite and likes to spend a lot of time in her social circle and knitting new relations.

Tasks

She comes from a wealthy family, and is very attached to the city. She believes she is the ideal person for asking advice and knows everyone in town. (Her role as fundraiser is due to the fact she is very chatty but also very articulate and convincing, she knows all there is to know and sees potential in the Discovery Center).

Frustrations

She knows Nashville gets most of the attention from investors, and would like to see the city return to its past glory (it was for a short period the capital of TN). She feels the Discovery Center is not living up to its standards.

About Nathaniel

"Ever since I got in from of an Atari 800 computer, I knew I had an urge to find out how the world works and build things on my own"

Name

Nathaniel Matthews

Age

37

Status

Married

Location

Murfreesboro, TN

Role

Owns an IT consultancy firm in Tennessee.

Goals

Raise funding for the C.O. Polk Interactive Museum.

Behavioral Considerations

First to graduate from college in his family, this motivates him to go fundraising and generate awareness of the importance of having kids into STEM early on. Knows the museum promises this, but would like to expand it and make it come true. Messianic, role models: Elon Musk, Bill gates. Cares deeply to make an impact in Murfreesboro, and sees his own life story as a successful path and preaches its benefits to others.

Tasks

He's fundraiser, can't have kids that's why he puts his extra energy on helping the museum grow as an institution.

Frustrations

Nathaniel knows that in the coming decades the city needs to ramp up its technology services, he's aware of the constant decline in tech jobs.

About Dominic

"I'm a great believer in luck, but if you'd ask me to Gamble my company again, I would have to hesitate"

Name

Dominic Mellon

Age

73

Status

Married

Location

Murfreesboro, TN

Role

Founder and CEO of a transportation company

Goals

Over the years he has seen the benefits done by building new structures and expanding the center. Right now given the unemployment figures in the city, he sees an expansion in the museum as a way to draw resources, generate jobs and help aid his political views. He is held in high regard by different layers of society.

Behavioral Considerations

Dominic was born to a wealthy family, though not typical in the southern sense. They come from early industrialists, and thus hold very liberal views. He studied in Dartmouth and majors in philosophy. However, coming from a background of early adopters and entrepreneurs, he joined a group of friends and formed a transportation company and has since, been one of the most successful individuals from Tennessee.

Tasks

Even at 73 he is a very busy man, he handles a massive business and is aware of the impact he can have in the lives of his fellow citizens. He wants to make key donations but needs to find the right project, he is a long term goal planner.

Frustrations

He is very energetic and productive, and doesn't waste time in futile enterprises. He wants to find the right way to help the city but needs a good project to invest his time and money in.
