EX-0.4

Project Overview

Museums are changing. The idea of a monolithic encyclopedic museum is changing to one of a personalized experience that extends beyond the walls of the museum to include online communities, social media and inclusive experiences. Virtual Reality, Artificial Intelligence and Deep Learning will have profound effects on museums, museums previously communicated a "single channel" of content in the form of printed wall mounted graphics. With the advent of the internet and the museum digital revolution the channels of communication of content become unlimited.

The C.O. Polk Interactive Museum will be part of this quickly changing museum model of the digital museum. The objects and artifacts of the museum will be catalogued (photographed and assigned a catalogue number) and assigned metadata (descriptive words, narrative descriptions, keywords, dates, key figures). Each object in the database will then be able to be accessed online through the museum website and online visitors will be able to create personalized museum collections of their own. In addition the museum database will be available in-person at the museum at the Touch Table and the Object Table. Both the Touch Table and the Object Table will have games that will meet Georgia School Curriculum Guidelines and teacher guides.

The management of the museum will require a new mindset, one of a constantly changing museum. Museum staff will work with every visitor to create personalized journeys through the museum.

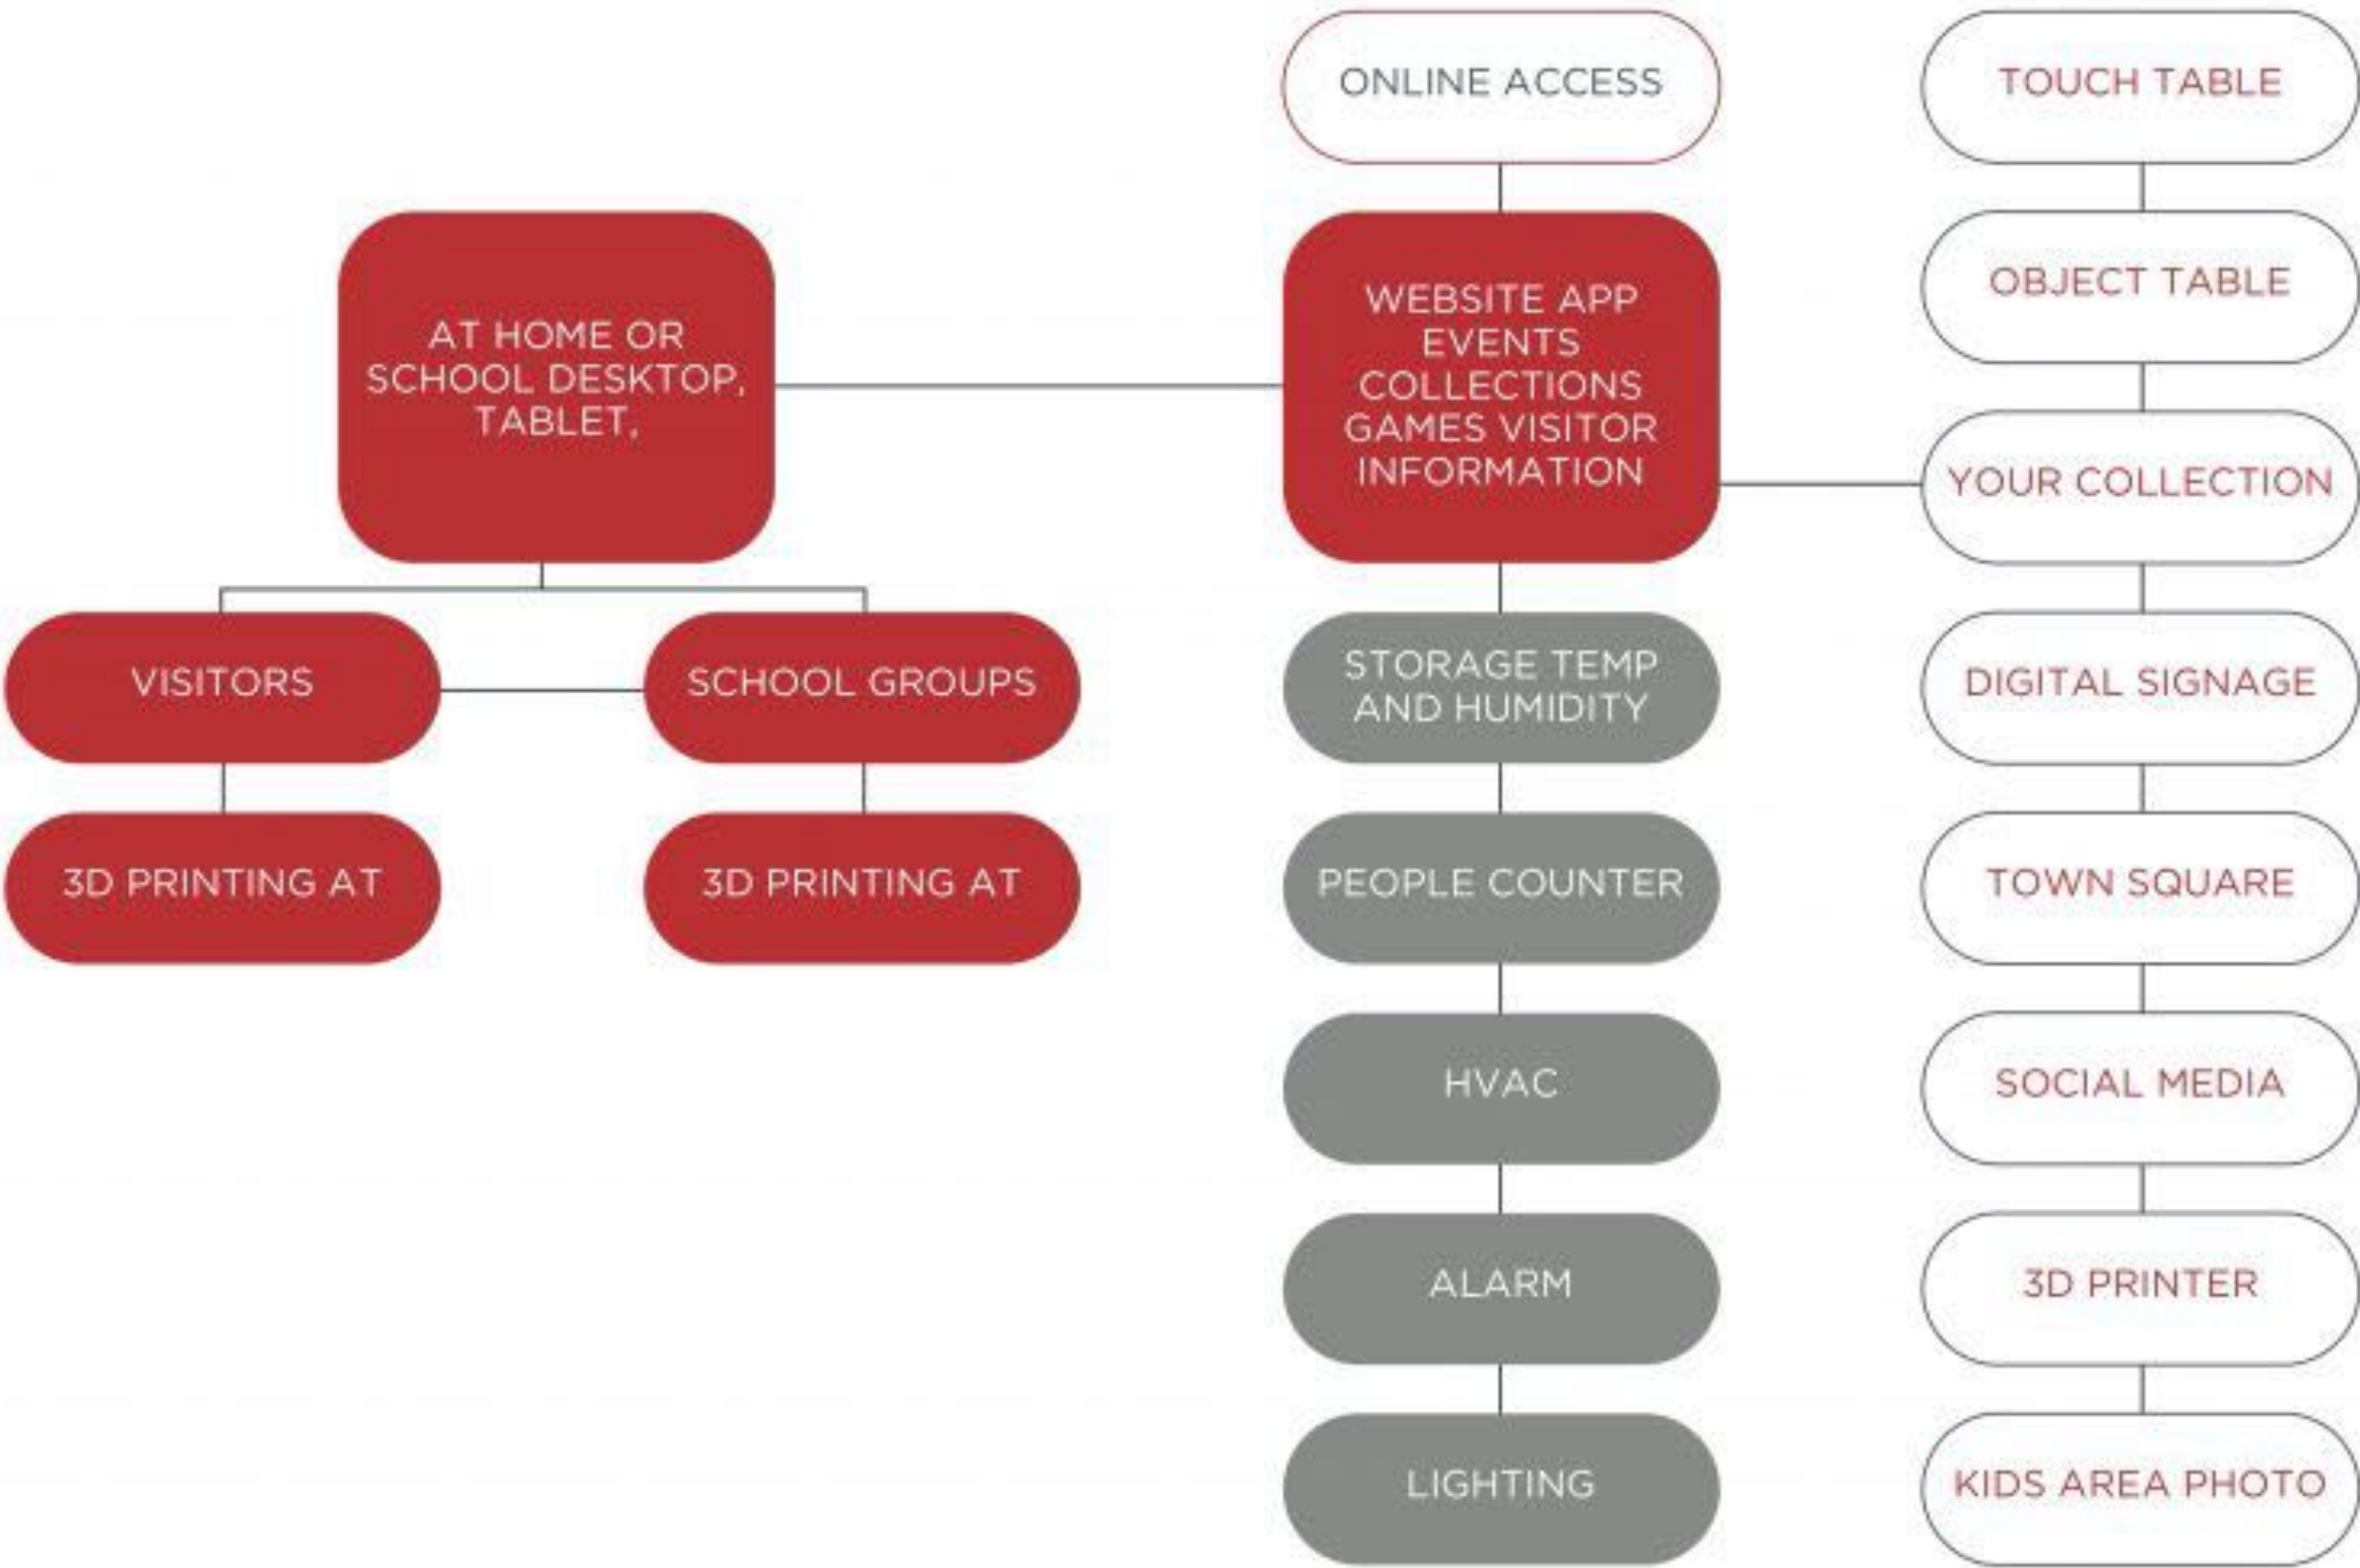

There are five major annual events planned, Martin Luther King Day, The Geranium Festival, 4th of July, Halloween and Christmas. For each the staff of the Museum will be able to use the database to create customized signage for the two (2) street LED monument signs, and the six (6) wall mounted exhibit digital signs. Staff will be able to easily create customized event signage.

Museum Database, Software and Digital Signage is to be user friendly with a clean easy to use aesthetic. The software to be easily used by online visitors, in-person visitors, school teachers and museum staff. Access to the cloud based software to be through the [C.O. Polk Interactive Museum website](#).

Database and Software System Requirements:

- 1. Cloud Based Database with input fields for photos, video, descriptions and searchable metadata
- 2. Website collection viewer that can be personalized to individual visitor museum collections
- 3. Ability to output database to Touch Table and Object Table with game "skin" similar to Quizlet that uses database content
- 4. Cloud based online digital signage creator with user friendly interface and output to user selected digital signs
- 5. Ability to port database to other partner museums. Additional area museums can create their own database and share content with the C.O. Polk Interactive Museum

PROJECT OVERVIEW

EX-0.1

Design Brief:

The McDonough Square interactive will be a focal point of the Main Gallery. The interactive gives a narrated tour (ceiling mounted speakers) of the McDonough Square from before the square existed to the present day. The interactive start will be triggered by a ceiling mounted motion detector. Two ceiling mounted projectors project onto a floor square platform. A "mini mayor hologram" provides a tour over time of the McDonough Square. A section of the projection platform will be used for captioning.

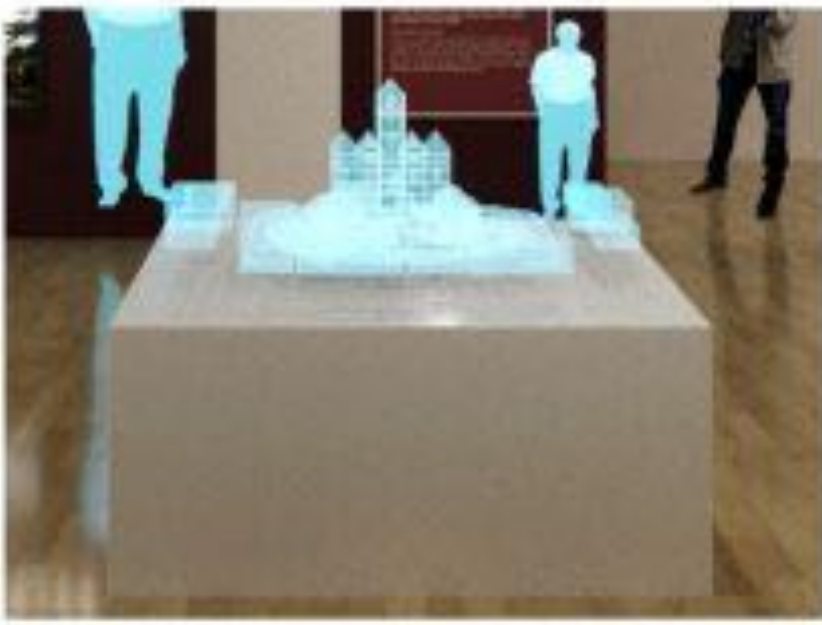

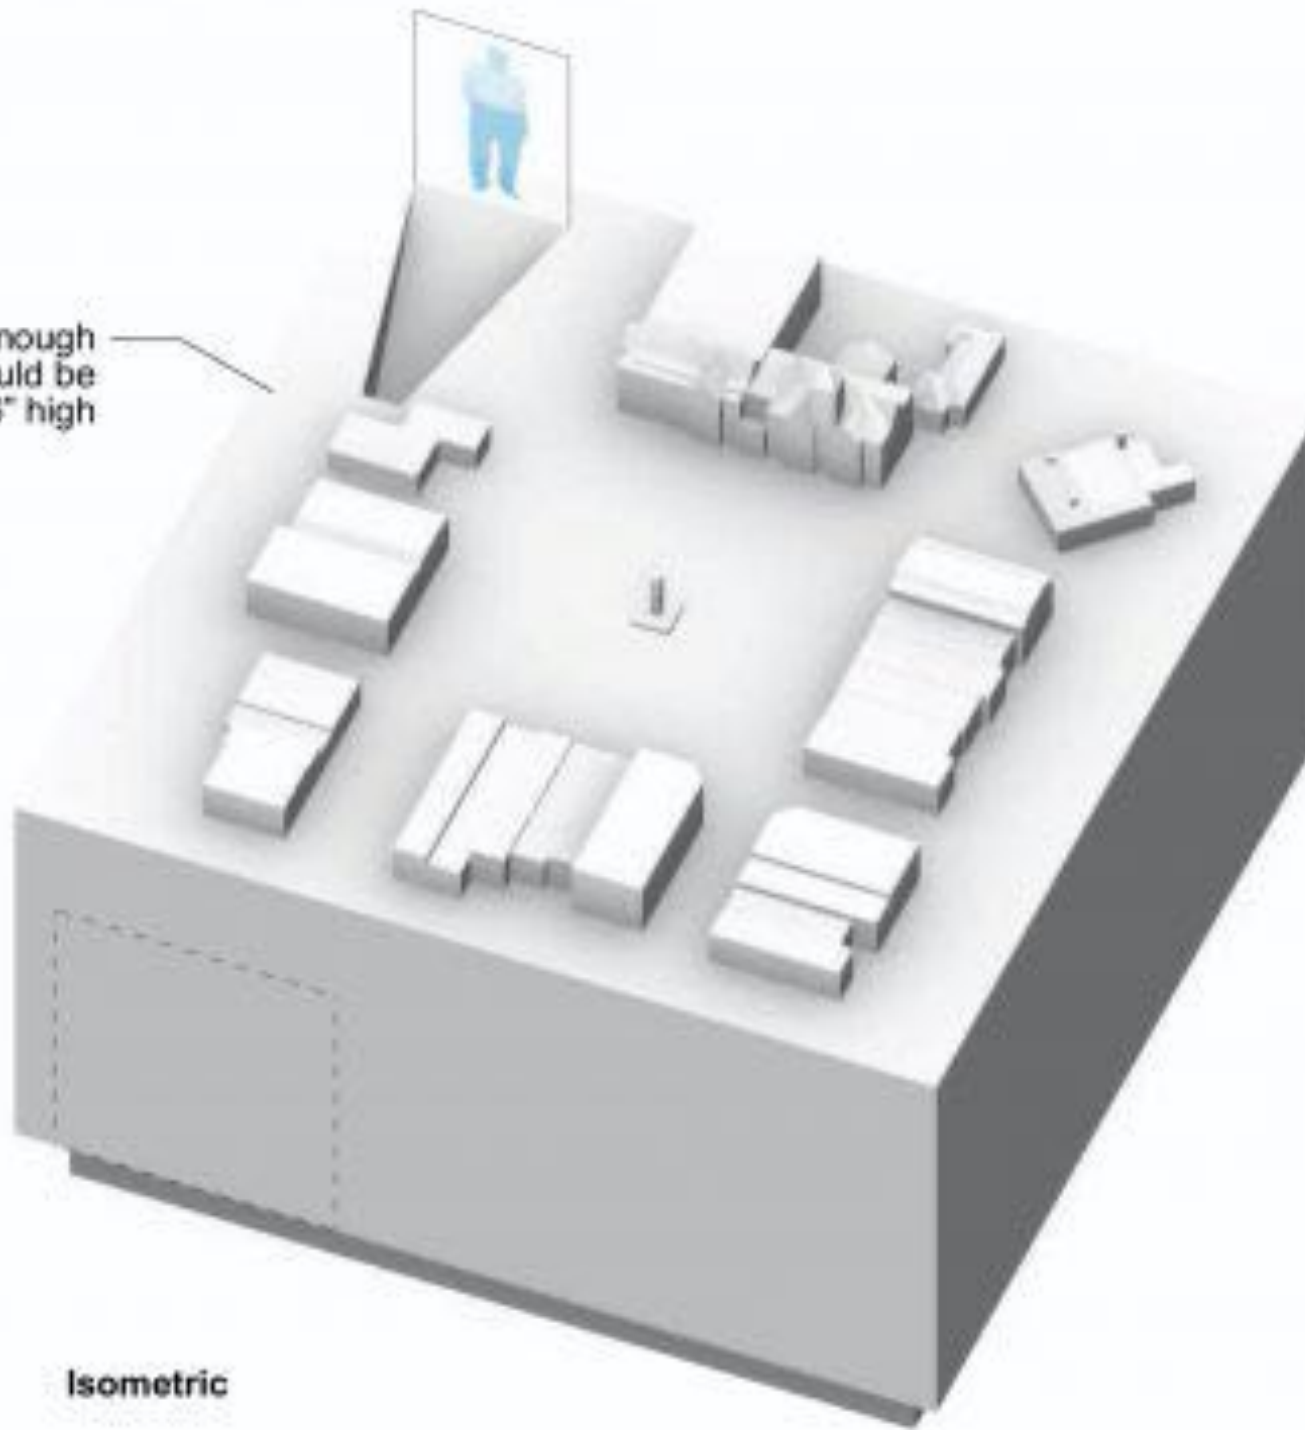

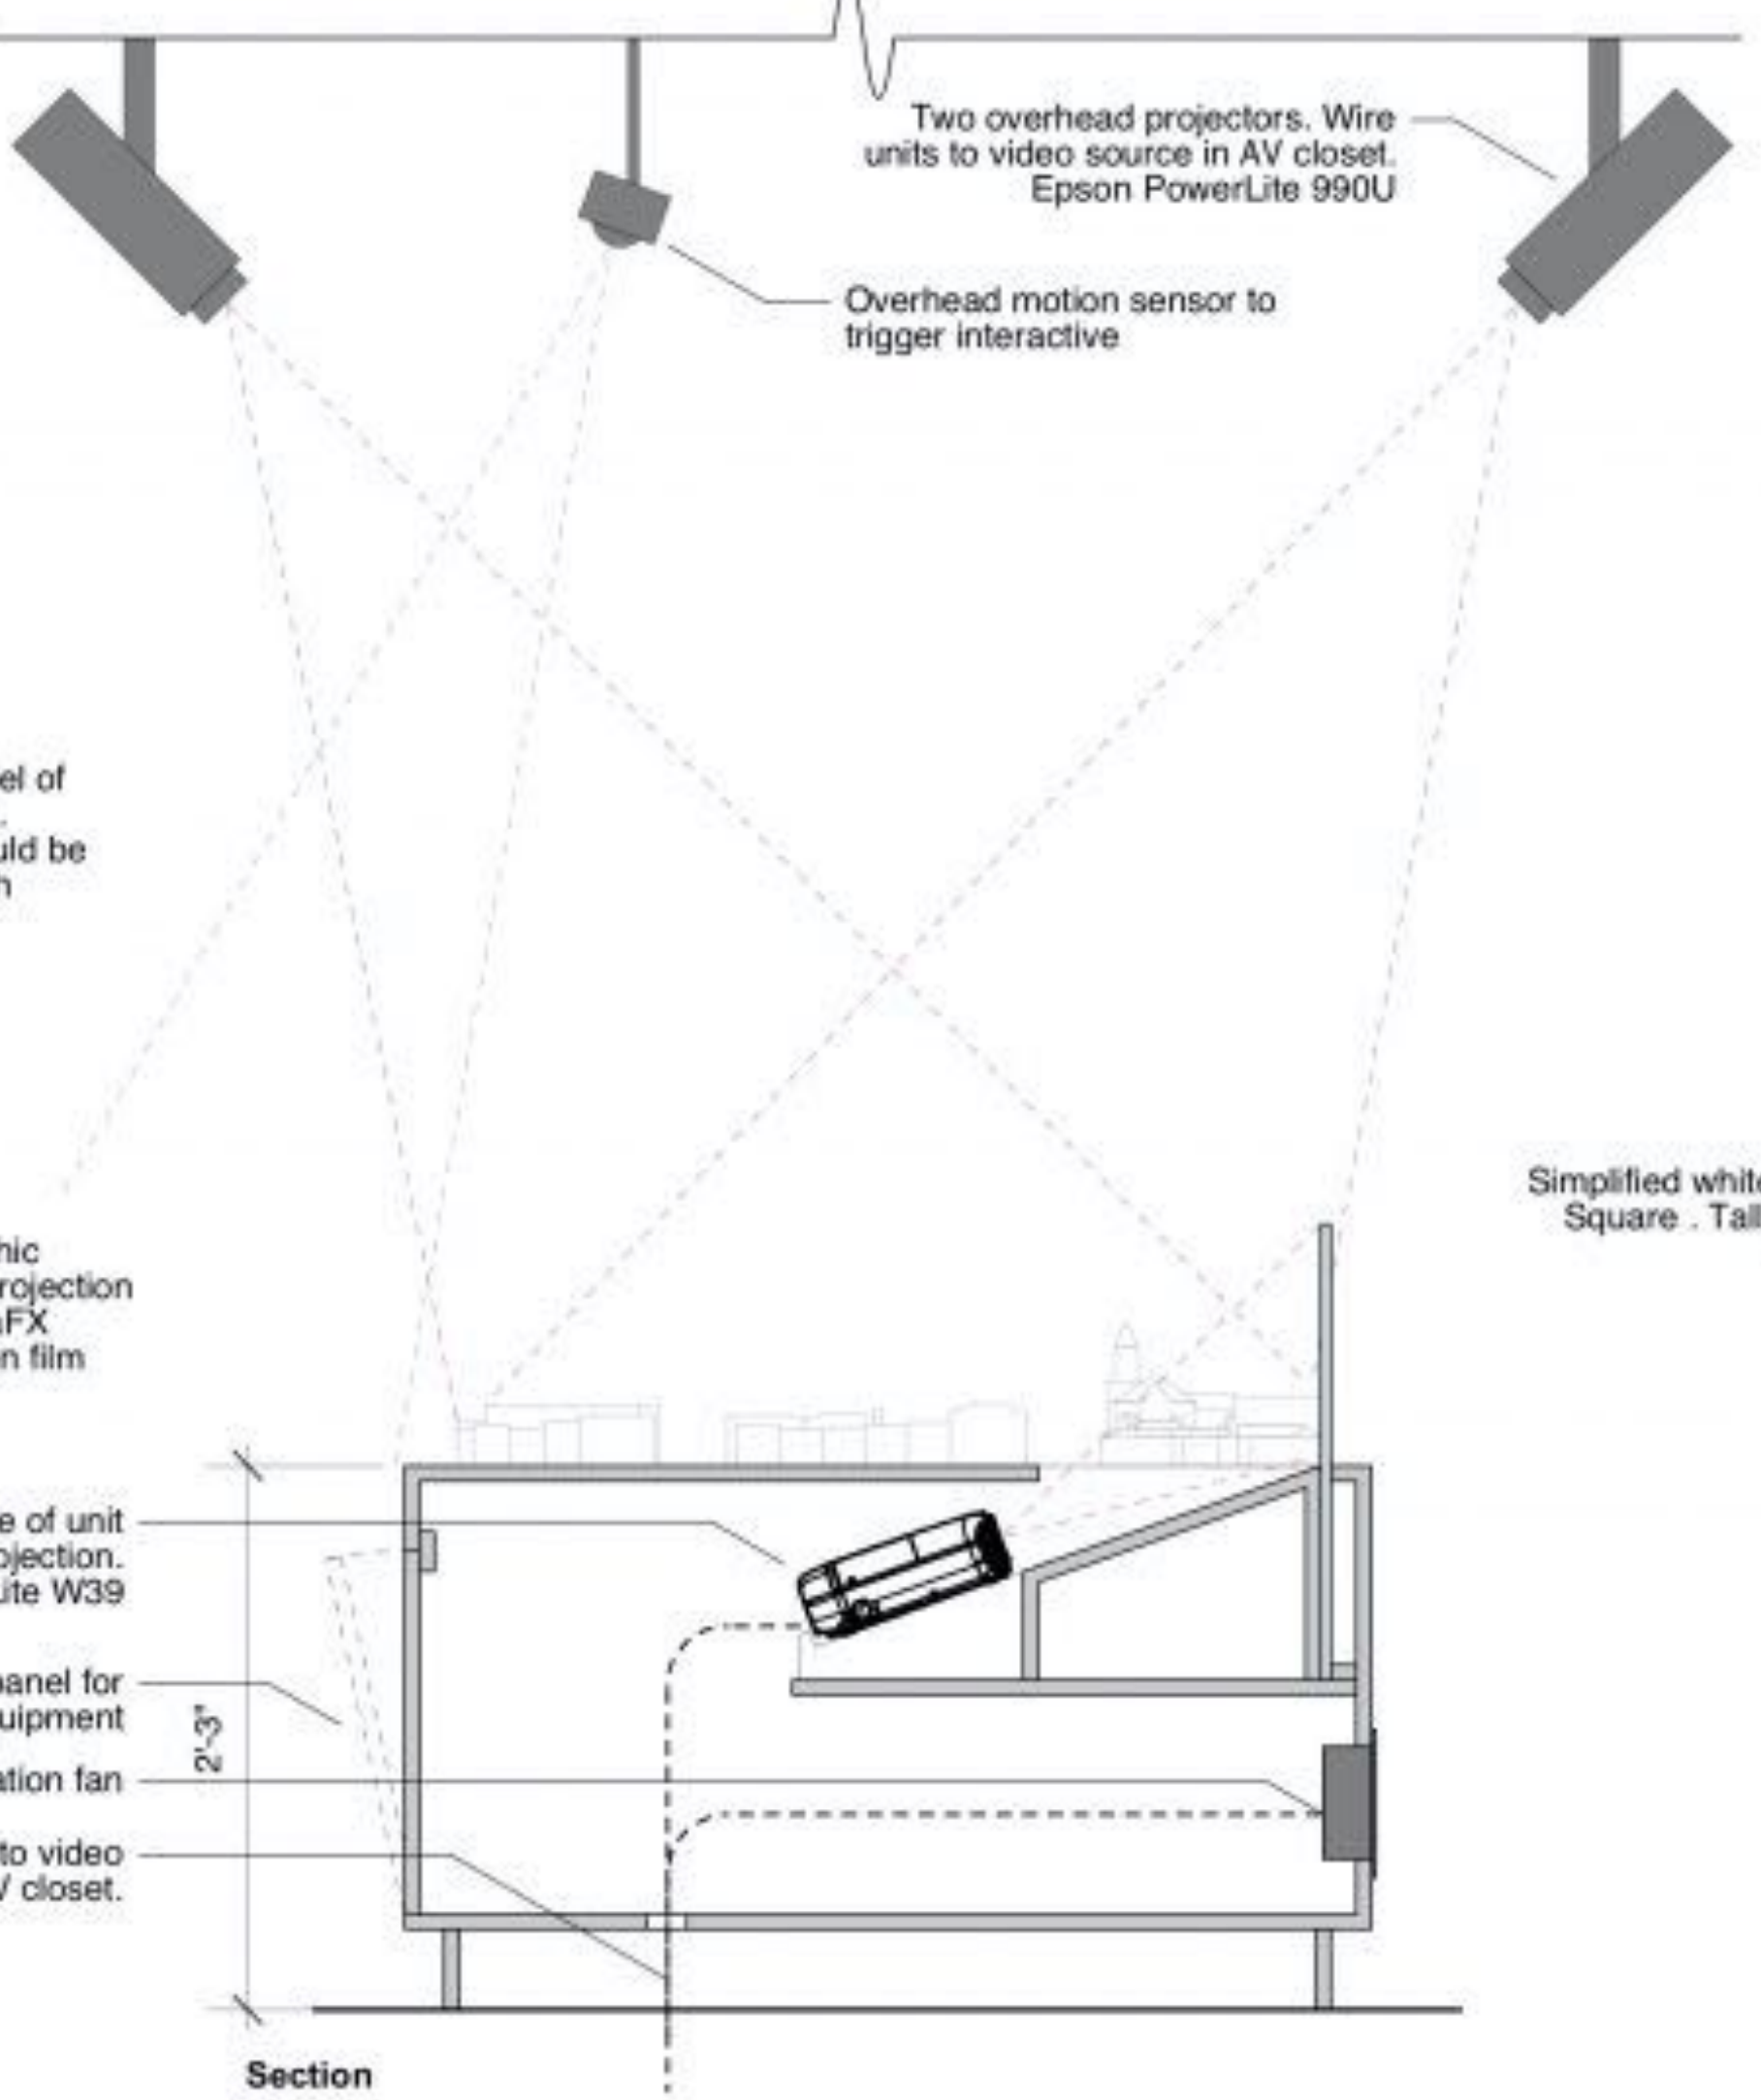

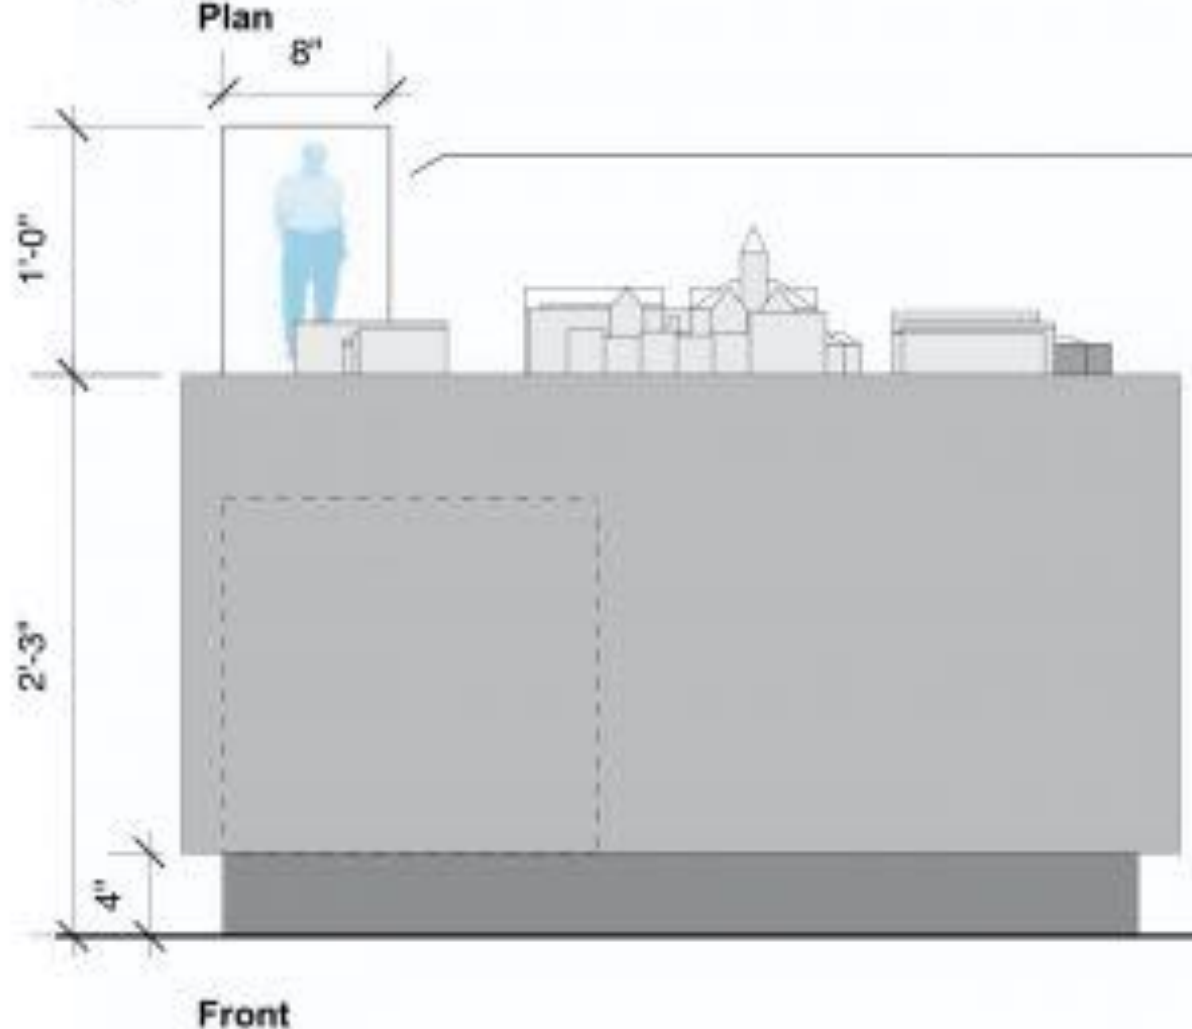

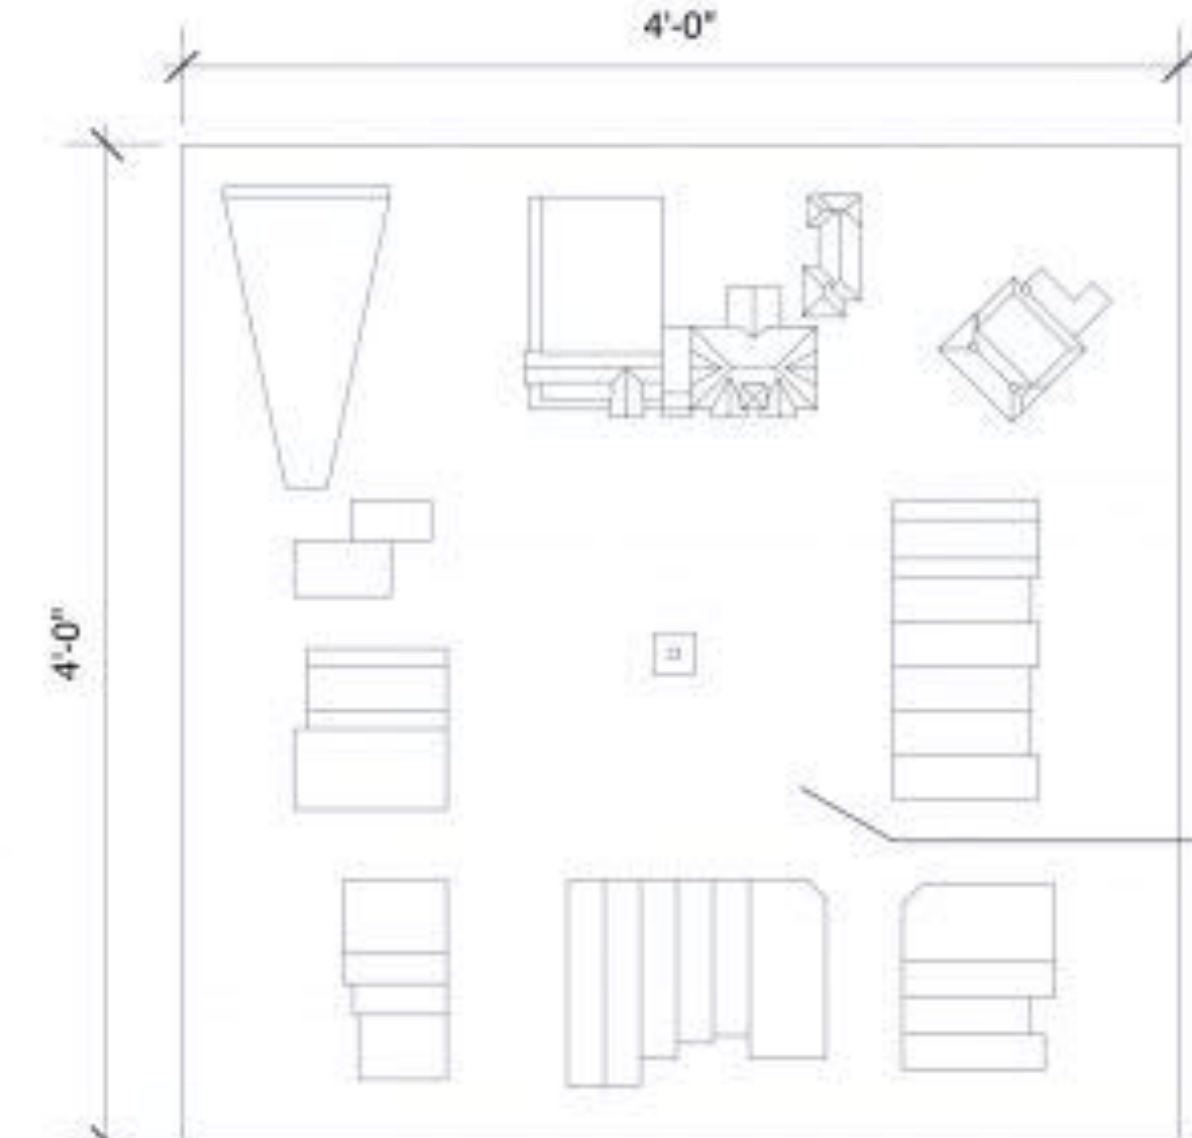

The exhibit furniture will be constructed of formaldehyde free apple plywood, CNC router table cut. The construction of the exhibit furniture will be a "maker" aesthetic. The apple plywood furniture will be stained to match the oak flooring. The bases will include a black kick.

McDonough Square Progression

- Attract, Mini Mayor:** "Hello, come on over, let me tell you about the history of the McDonough Square". (Projection of 1920 McDonough Circle)
- Scene One:** Projection of McDonough Square land before McDonough Circle. Mini Mayor Hologram narrates the history of Creek Indians in the area.
- Scene Two:** 1823 Commodore Thomas Macdonough and the founding of McDonough
- Scene Three:** Town Circle projection with mini mayor hologram tour
- Scene Four:** 1940 McDonough Square projection texture mapped onto ten 10 white painted blocks that represent buildings on the McDonough Square with mini mayor hologram tour
- Scene five:** Henry County projection of the area of Henry County, with mini mayor hologram tour (ten 10 white painted blocks disappear due to texture mapping)
- Scene Five:** Present Day projection texture mapped onto ten 10 white painted blocks that represent buildings on the McDonough Square with mini mayor hologram tour

- Components:
- (2) overhead projectors
 - (1) overhead motion sensor
 - (1) projector in base of unit

Closed captioning available on the table. T Coil Hearing Loop Enabled

1 Town Square Interactive
Scale: 3/4"=1'-0"

Design Brief:
The C.O. Polk Interactive Museum will be event driven including summer camps, morning and afternoon programs. Morning programs will be held in the kid's area with a story time, museum staff will read stories to young museum visitors. Afternoon and summer programs will include maker activities with the possibility of a future [Maker Faire](#). The area at the entry to the kid's area will serve as a three-dimensional printing area. Objects of the museum collection will be three dimensionally scanned and printed. Visitors can choose to leave their printed object in the museum to see on future visits or take their 3D printed objects home

- Components:**
(1) McMaster Carr Cabinet Workbench #9760T13
(1) Makerbot Replicator 2 3D printer
(1) Handheld Structure 3D Scanner and iPad
(4) Replacement wheels
Apple ply cladding, three sides

EX-5.6

Design Brief:

The history of McDonough is rich with stories, the Camp Creek Train Wreck, the Making of Smokey and the Bandit and much more. A 65" touch table with a trough to hold objects surrounds the table. The table has ten (10) objects and related stories to select. Up to three users can simultaneously review objects and stories.

Sample Interaction:

1. McDonough Objects
2. Touch to start
3. Pick an object that is of interest
4. (Ball of Cotton placed on table) Cool that is a raw cotton, McDonough was a hub for cotton processing and distribution. (Short video of cotton processing)
5. Try a different Object
6. (Spool placed on table) That is a spool for thread the raw cotton is processed to become thread (short video of making of thread)
7. Try sharing with your friends at the table, share your objects with them and their objects with you. Which story do you prefer ?

<http://tangibleengine.com/> or similar touchscreen object recognition

Closed captioning available on the table.
T Coil Hearing Loop Enabled

Components:

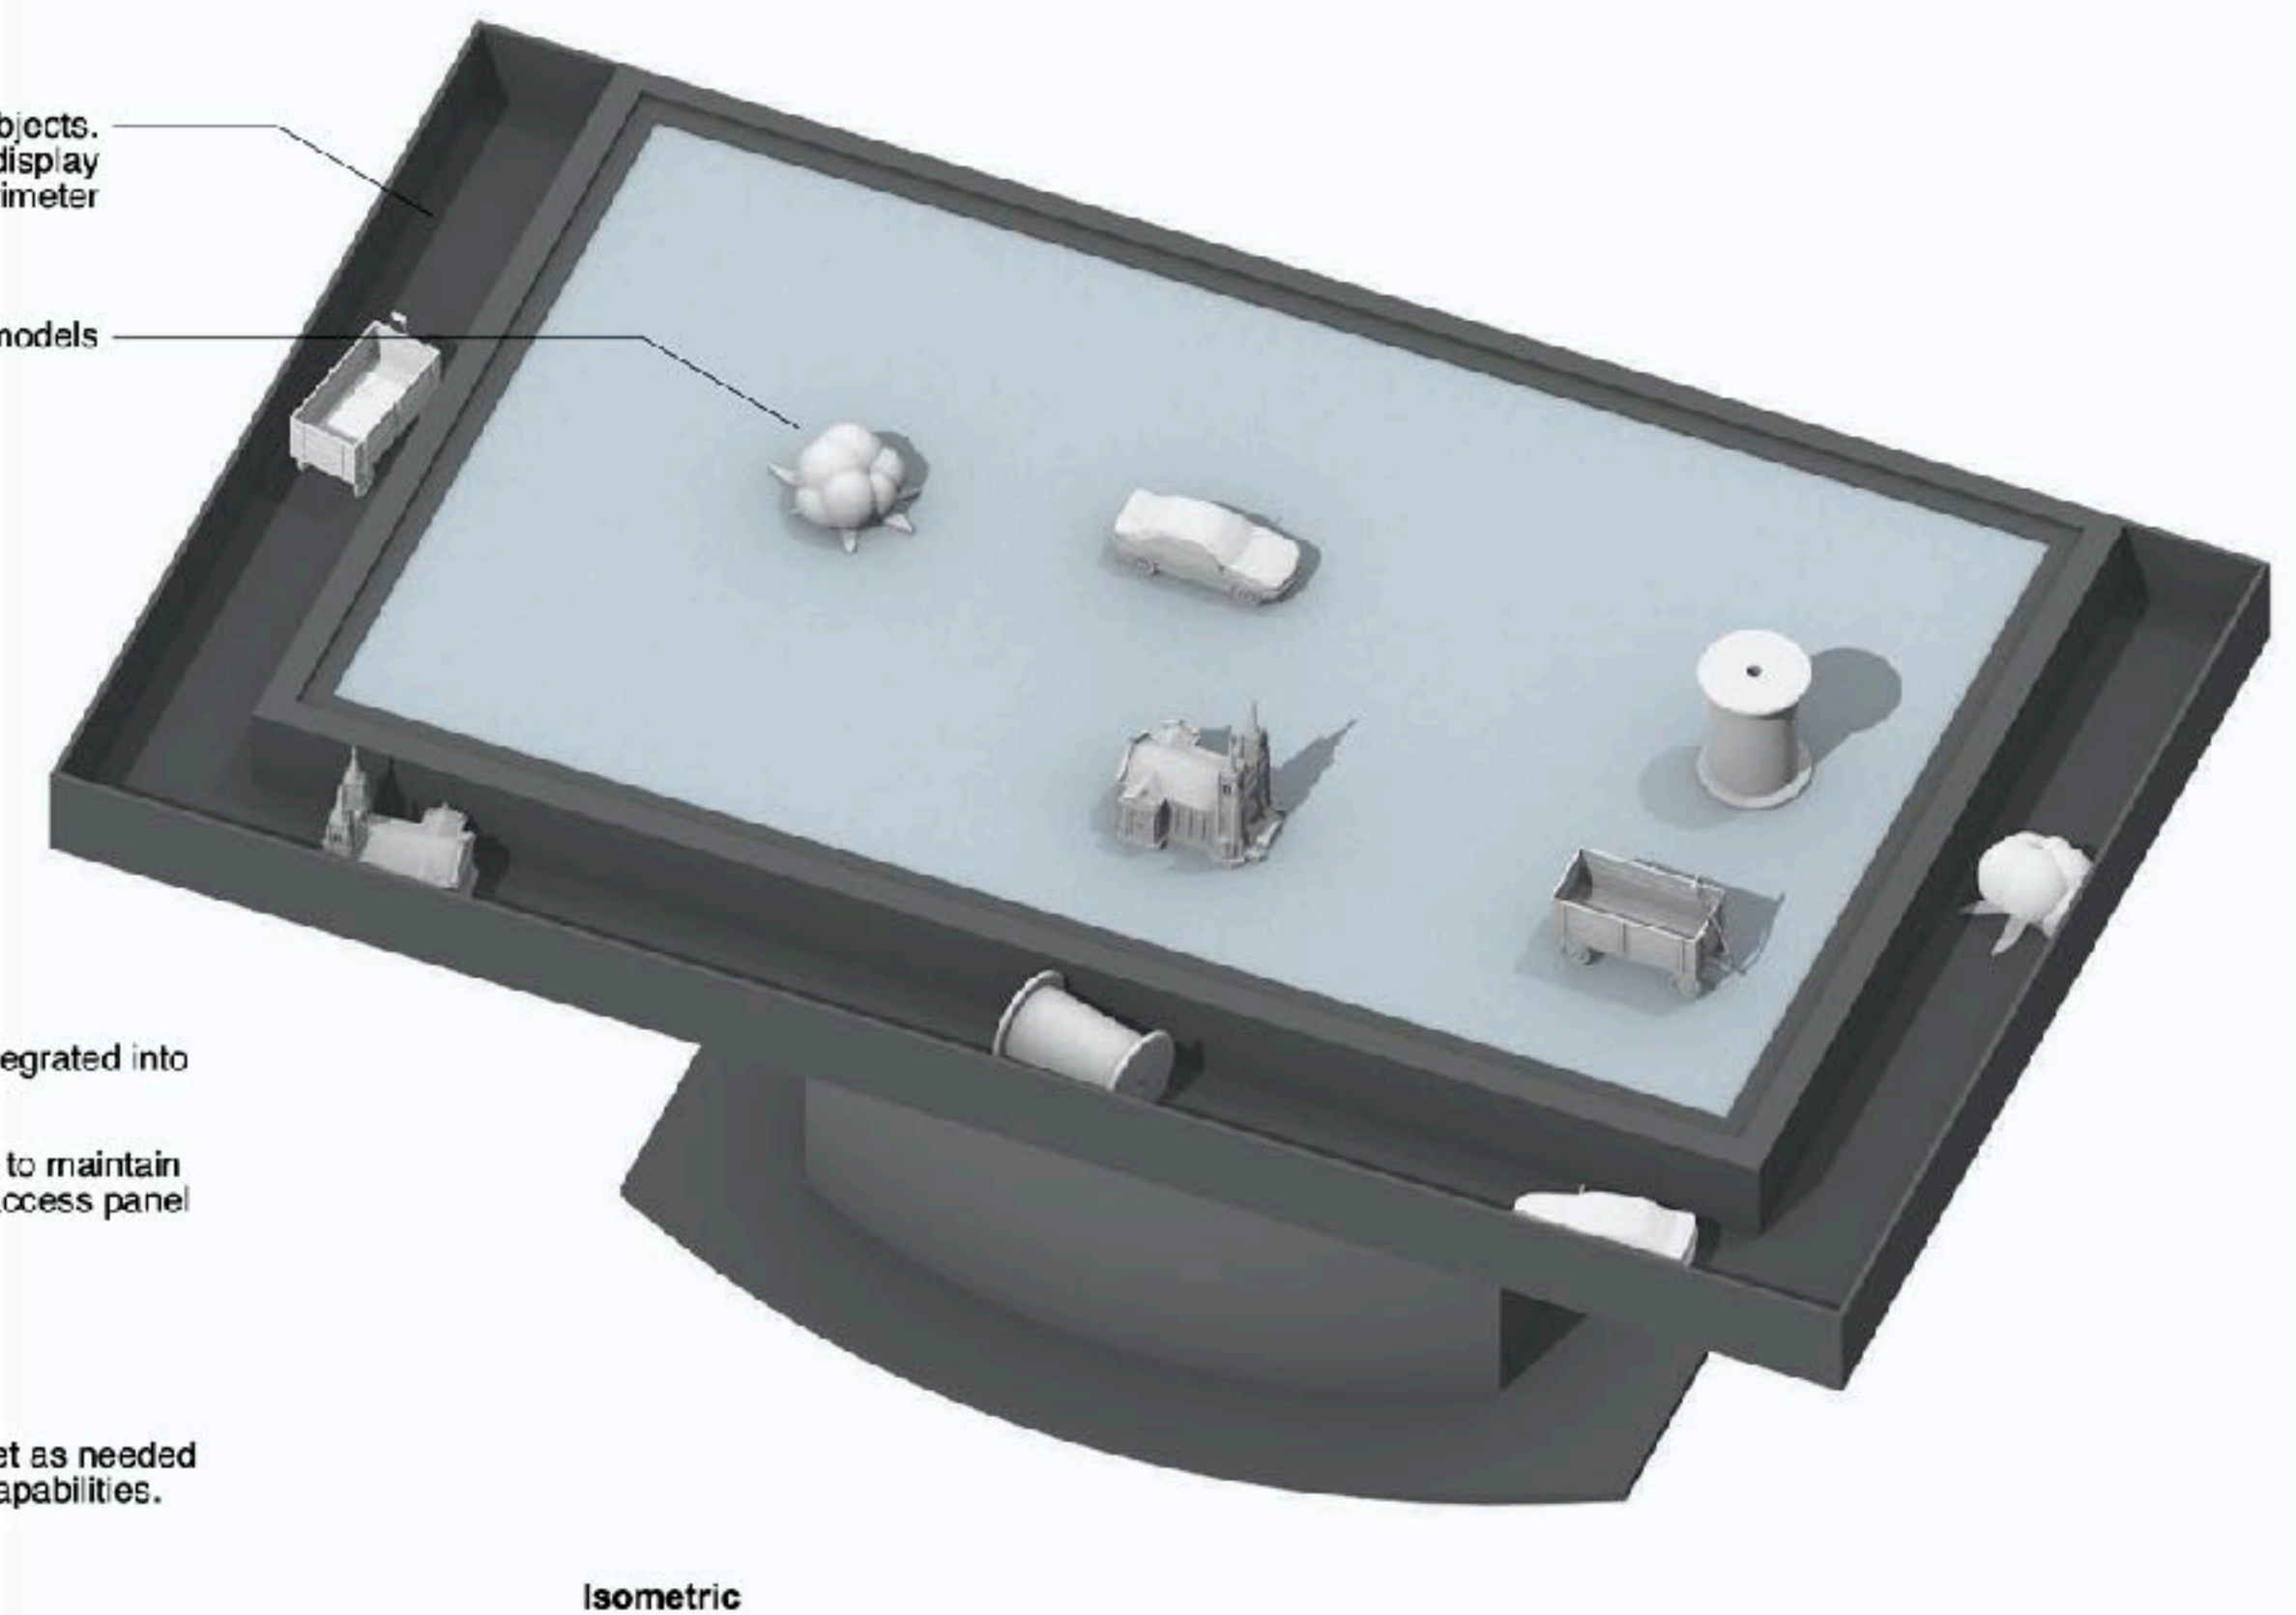

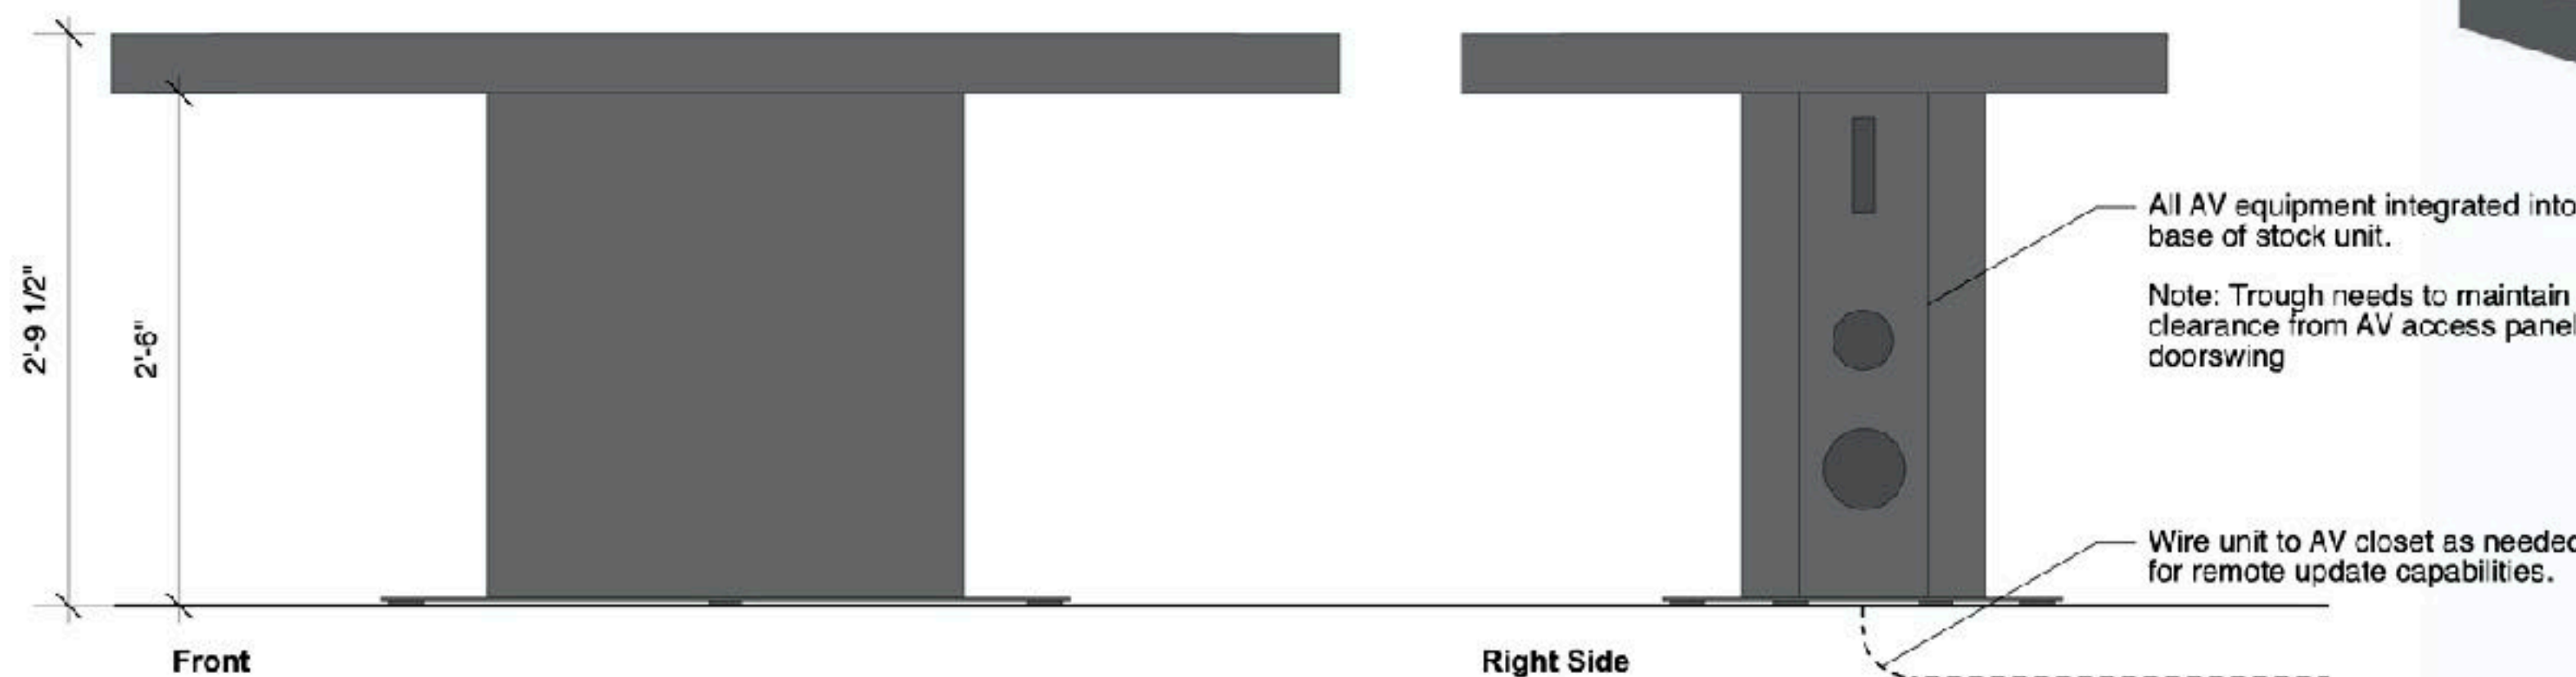

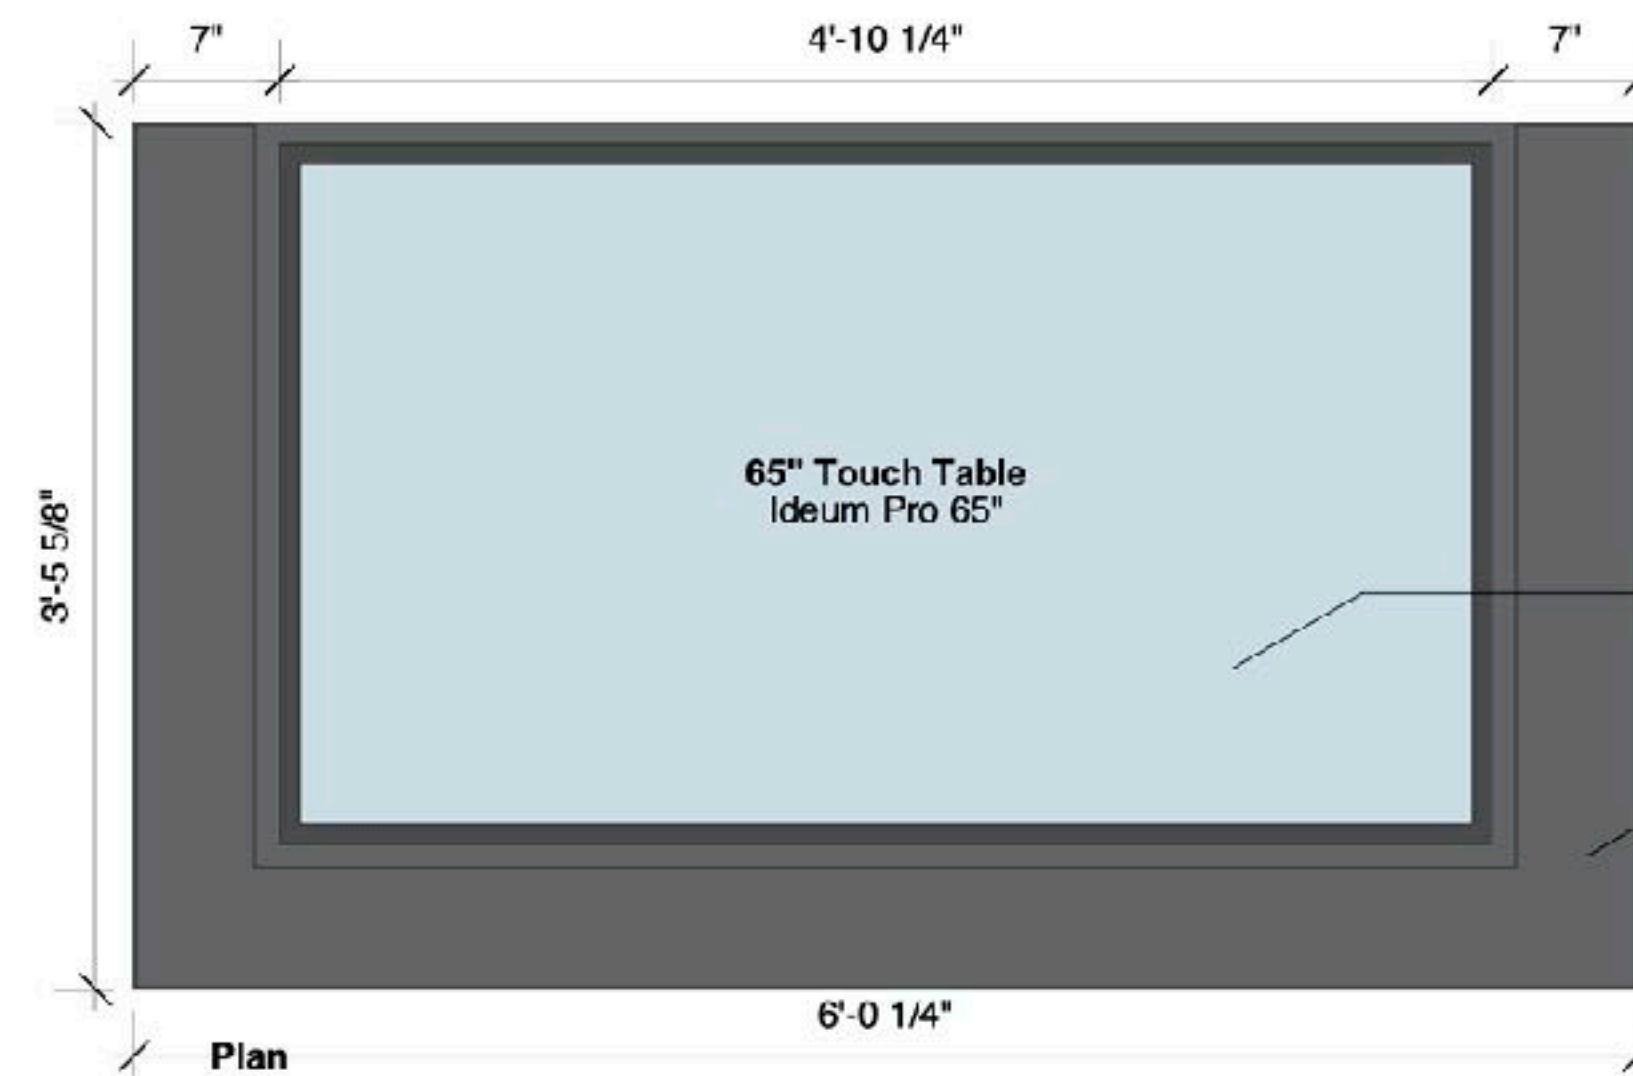

- (1) Ideum Pro 65" Touch Table wired to A/V closet
- (1) Wrap around trough on three sides
- (10) 3D printed models approx. 6-8" max dim

Possible Objects and Stories:

- Camp Creek Train Wreck
- Area Churches
- Travel North to South
- Highways
- Wagons
- Jean Charlot
- Spool
- Cotton
- Car

MCDONOUGH HEA

McDonough Heart

McDonough Heart is a project that aims to create a sustainable and healthy environment for the future. It is a project that is inspired by the work of McDonough and Braungart, who are leading the way in sustainable design. The project is a collaboration between McDonough and Braungart, and it is a project that is inspired by their work. The project is a collaboration between McDonough and Braungart, and it is a project that is inspired by their work.

MCDONOUGH TIMELINE

Jean Charlot

MCDONOUGH HEART

HERE AT THE C.O. POLK INTERACTIVE MUSEUM 3D PRINTING AREA

You can learn to scan an object, how to prepare the scan for 3 dimensional printing and how to upload the prepared file to the 3D printer.

Creating a 3D print of an object is not as easy as it sounds. Every day we have a 3D printing program at 3:00 PM and on weekends at 11:00 AM and at 3 PM. Be sure to check out our 3D printing summer camps offered in July and August.

C.O. POLK

18"w x 24"h

The mail from the postal boxes on the street are picked up every day except Sunday and brought to the post office to be sorted and delivered.

*"Neither snow nor rain nor heat nor gloom
of night stays these couriers from the swift
completion of their appointed rounds."*

The unofficial motto of the United States Post Office

C.O. POLK

THANK YOU!

For visiting the C.O. Polk Interavtive Museum Kid's Post Office.

Before leaving please make sure that you put away your uniform, leave the mail neatly on the sorting table and clean off the postcard art table.

Always remember, treat others as you would like to be treated.

C.O. POLK
INTERACTIVE MUSEUM

18"w x 24"h

WELCOME TO THE C.O.POLK INTERACTIVE MUSEUM KID'S AREA

This building opened in 1941 as a United States Post Office. Visiting the post office was more than a daily chore; it was a time to catch up on local news and say "hi" to friends that you would see on the McDonough Square.

Here at the C.O. Polk Interactive Museum Post Office, kids can learn how the postal system works, create a letter to send to a friend and stop by for reading time.

The Kid's Area is for children 0 - 5 years old.

Please always remember the "golden rule" treat others as you would like to be treated.

This area does not have any electronics; we believe that it is important for children to develop their imaginations.

Please no food or drink in the Kid's Area. There are picnic benches outside if you would like to have a snack.

Please leave your strollers here or at the entrance next to the entrance desk.

HAVE FUN!

18"w x 24"h

CAN YOU SORT THE MAIL TO GO TO THE CORRECT ADDRESS?

Before there were bar code readers for mail, all the mail was sorted by hand.

All the letters on the table have a name, address and zip code, which is a number to identify where people live.

CAN YOU SORT THE MAIL BY SIZE?
FROM BIG TO SMALL?
FROM A TO Z FROM 0 TO 10?

WORK WITH YOUR FRIENDS TO SORT THE MAIL TOGETHER.

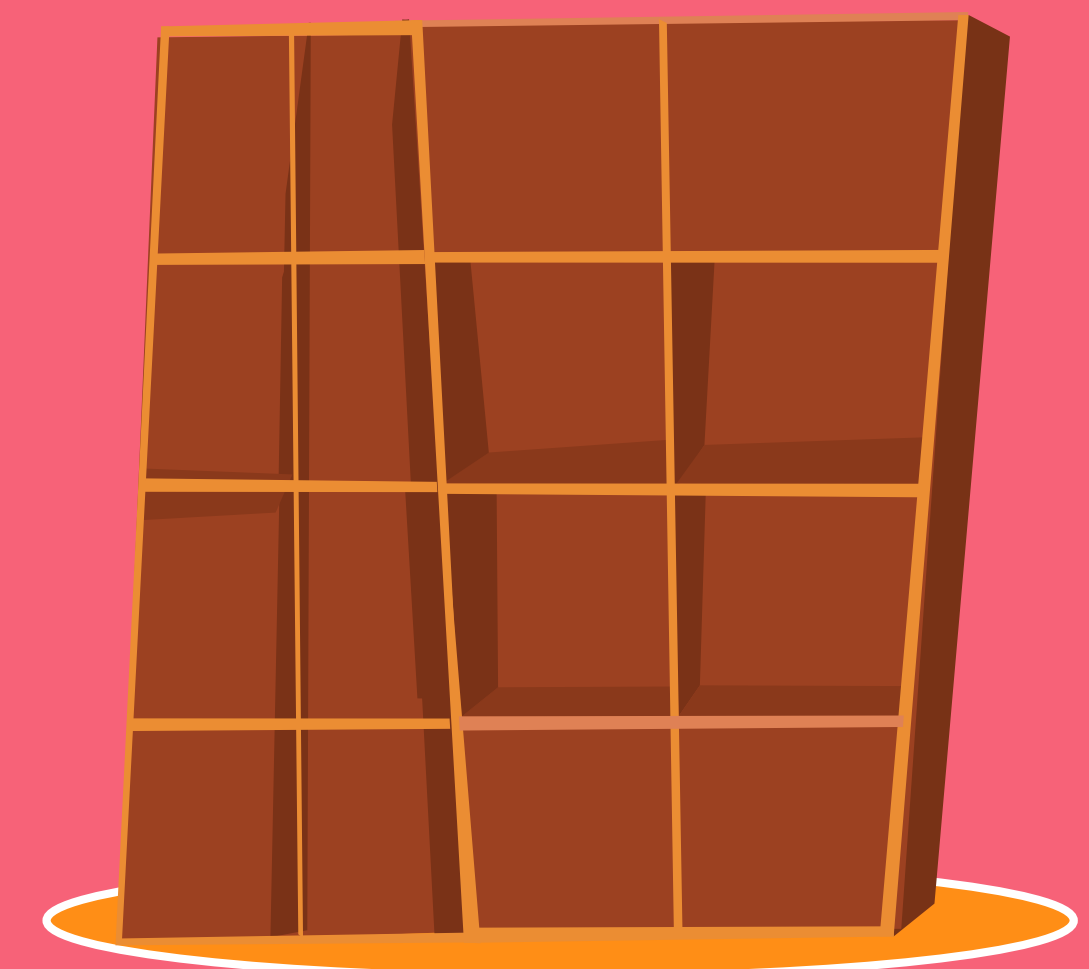

C.O.POLK
